			ART UNIT 2131	PAPER NUMBER
			NOTIFICATION DATE 05/30/2007	DELIVERY MODE ELECTRONIC

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

PTOmail@sciatl.com

Office Action Summary	Application No.	Applicant(s)	
	10/602,988	WASILEWSKI ET AL.	
	Examiner	Art Unit	
	Longbit Chai	2131	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 April 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-12 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-12 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 25 June 2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. Presently, pending claims are 1 – 12.

Response to Argument

2. As per claim 1 – 12, Applicant remarks “since claims 1 – 12 receive the benefit of the earlier filing date of at least January 20, 2000 from U.S. Pat. No. 6,252,964 (in column 27 and 28) and thereby, Unger is not a valid reference under 35 U.S.C. § 102(e)”. Examiner respectfully disagrees because, after some investigations, the newly amended / added claim limitation “wherein the second encryption method is different from the first encryption method” filed on 21 November 2006 was not supported by U.S. Pat. No. 6,252,964 (in column 27 and 28 as mentioned by Applicant) and therefore it can not receive the benefit of the earlier filing date of January 20, 2000. Examiner notes different encryption methods of content protection are not necessarily required for different EMMs with different applications such as a near video on demand (NVOD) and a pay per view (PPV).

Priority

3. Applicant's claims for benefit of Continuation-in-part of Application priority date under 35 U.S.C. 120 is acknowledged.

Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows:

The application is filed on 6/25/2003 but all of the claims 1 – 12 are not solely directed to originally supported subject matter present in the parent application (for example, related to partially-dual-encrypted data stream) such as newly amended claims 1 and 7 “encrypting the selected digital bit stream according to a second encryption method to provide a second encrypted stream wherein the second encryption method is different from the first encryption method”.

However, the later-filed application must be an application for a patent for an invention which is also disclosed in the prior application (the parent or original nonprovisional application or provisional application); the disclosure of the invention in the parent application and in the later-filed application must be sufficient to comply with the requirements of the first paragraph of 35 U.S.C. 112. See *Transco Products, Inc. v. Performance Contracting, Inc.*, 38 F.3d 551, 32 USPQ2d 1077 (Fed. Cir. 1994).

As a result, all of the claims 1 – 12 will not receive benefit of the filing date of the earlier file application, and thereby the effective filing date for the subject matter defined in the pending claims in this application remains 6/25/2003 (Please also see the section of *Response to Argument* above).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraph of 35 U.S.C. 102 that forms the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an

international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1 – 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Unger (U.S. Patent 2003/0026423).

As per claim 1, Unger teaches a method for providing a program in a conditional access system, the method comprising the steps of:

selecting a digital bit stream from a plurality of digital bit streams (Unger: Para [0055] – [0068] & Table 1 and Figure 6);

encrypting the selected digital bit stream according to a first encryption method to provide a first encrypted stream (Unger: Table 1 and Figure 6 / E318);

encrypting the selected digital bit stream according to a second encryption method to provide a second encrypted stream wherein the second encryption method is different from the first encryption method (Unger: Para [0036] and Para [0040] & Table 1 and Figure 6 / E324: Unger teaches (a) providing partial dual encryption methods utilizing an additional (secondary) PID for each duplicated component and these secondary PIDs are used to tag packets that carry duplicated content with an additional encryption method (Unger: Para [0036]) and (b) allowing each participating CA (Conditional Access) system to be operated independently and each is orthogonal to the other – for example, packets encrypted with Motorola's proprietary encryption can use fast changing encryption keys, while packets encrypted with NDS' smart card based system use slightly slower changing keys (Unger: Para [0040]));

multiplexing the first encrypted stream, the second encrypted stream, and the plurality of digital bit streams to provide a partially-encrypted stream (Unger: Table 1 and Figure 6 / E322 & Para [0053] – [0058]); and
transmitting the partially-encrypted stream (Unger: Figure 6).

As per claim 7, Unger teaches a method for providing a plurality of programs in a conditional access system, the method comprising the steps of:

selecting a plurality of elementary bit streams from a transport stream (Unger: Para [0055] – [0068] & Table 1 and Figure 6);

encrypting a portion of the selected elementary bit stream according to a first encryption method to provide a first encrypted stream (Unger: Table 1 and Figure 6 / E318);

encrypting the portion of the selected elementary bit stream according to a second encryption method to provide a second encrypted stream wherein the second encryption method is different from the first encryption method (Unger: Para [0036] and Para [0040] & Table 1 and Figure 6 / E324: Unger teaches (a) providing partial dual encryption methods utilizing an additional (secondary) PID for each duplicated component and these secondary PIDs are used to tag packets that carry duplicated content with an additional encryption method (Unger: Para [0036]) and (b) allowing each participating CA (Conditional Access) system to be operated independently and each is orthogonal to the other – for example, packets encrypted with Motorola's proprietary

encryption can use fast changing encryption keys, while packets encrypted with NDS' smart card based system use slightly slower changing keys (Unger: Para [0040]);

 multiplexing the first and second encrypted streams and the remaining portion of the selected elementary bit stream with the transport stream (Unger: Table 1 and Figure 6 / E322 & Para [0053] – [0058]); and

 transmitting the multiplexed stream (Unger: Figure 6).

As per claim 2, Unger teaches a portion of the selected digital bit stream is encrypted, wherein the encrypted portion and an unencrypted portion of the selected digital bit stream are combined with the plurality of digital bit streams (Unger: Table 1 and Figure 6 / E322 & Para [0058] Line 13 – 16).

As per claim 3, 6, 9 and 12, Unger teaches the selected digital bit stream includes a plurality of packets, and wherein each packet includes a packet identifier identifying whether the packet is at least one of a video stream, an audio stream, and a data stream (Unger: Table 1 and Para [0010] & [0047]: there are nine program digital bit stream, as shown in Table 1, constitutes video, audio and auxiliary data packet having a particular packet identifier).

As per claim 8 (and claims 4, 5, 10, 11 and 12), Unger teaches each of the plurality of elementary bit streams includes a plurality of packets, wherein each packet includes a packet header that is indicative of at least one of a video stream, an audio

Art Unit: 2131

stream, and a data stream (Unger: Table 1 and Para [0010] & [0047]: there are nine program digital bit stream, as shown in Table 1, constitutes video, audio and auxiliary data packet having a particular packet identifier).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Longbit Chai whose telephone number is 571-272-3788. The examiner can normally be reached on Monday-Friday 9:00am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ayaz R. Sheikh can be reached on 571-272-3795. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
